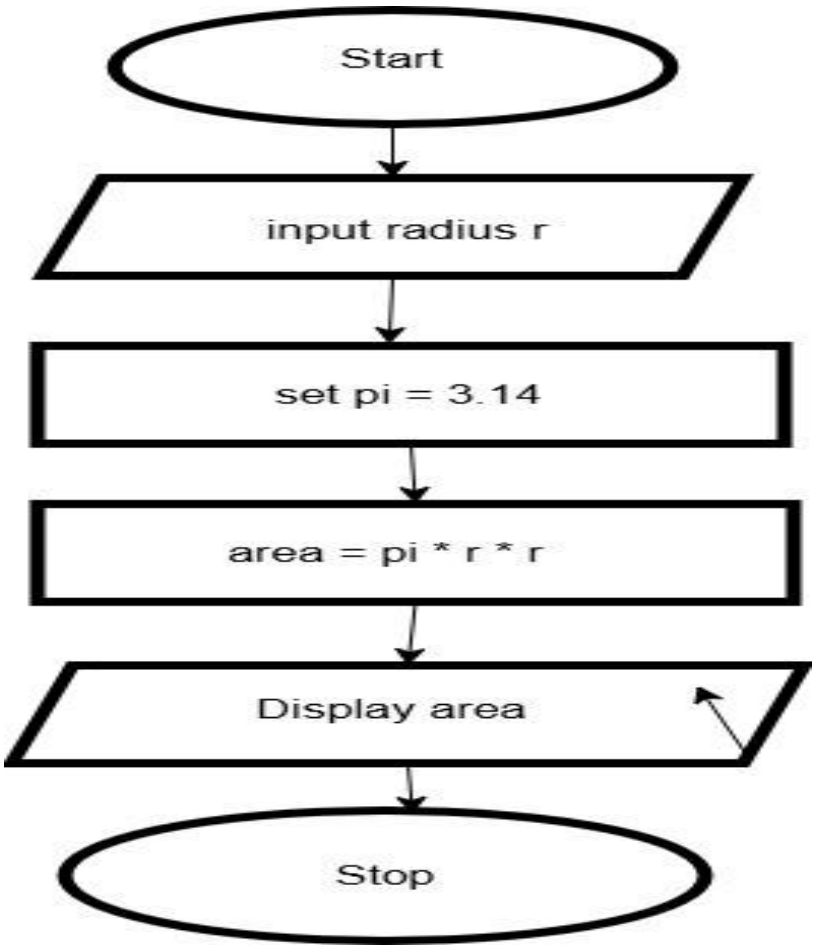
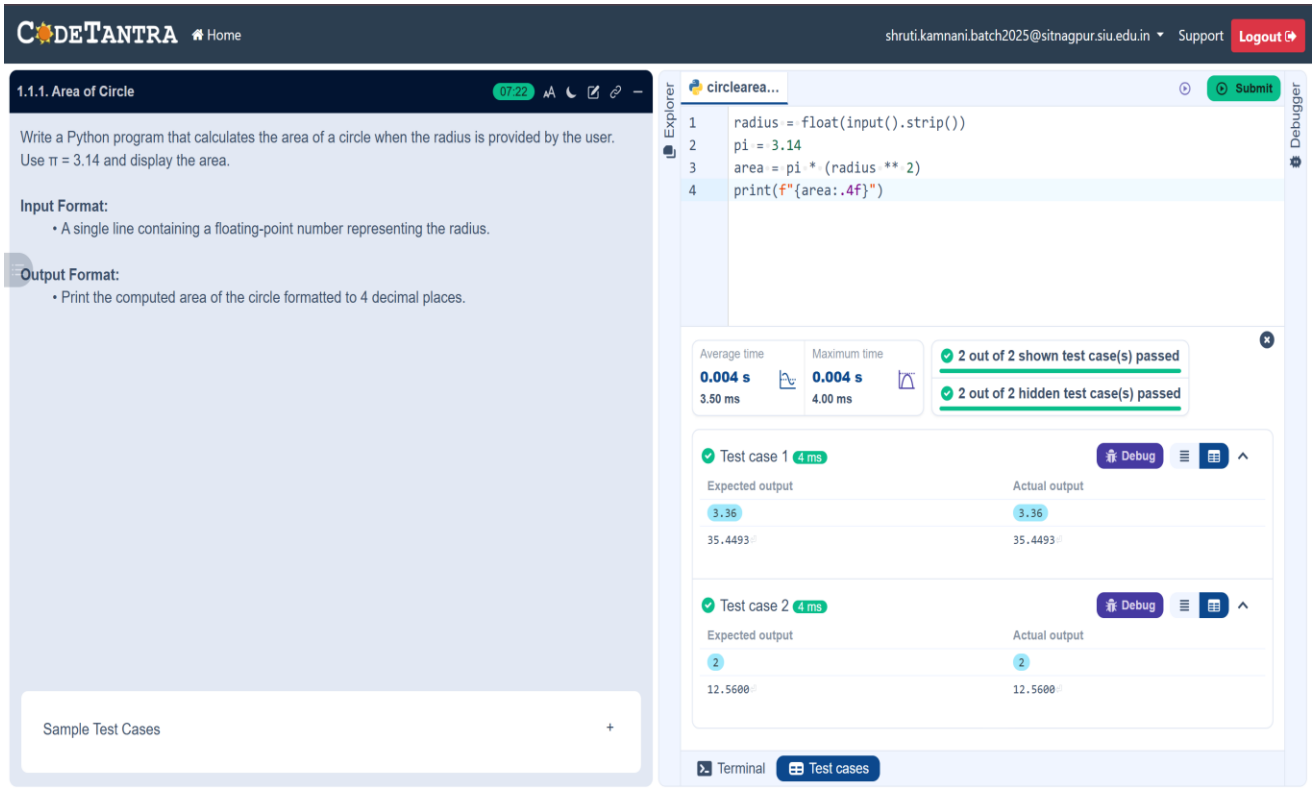
1.1.1 Area of Circle

Algorithm

1. Start
2. Input radius r
3. Set π = 3.14
4. area = π × r × r
5. Display area 6. Stop

Flowchart :-





Code:

```
radius = float(input().strip())
pi = 3.14
area = pi * (radius ** 2)
print(f"{area:.4f}")
```
